

Door & Window Alarm

INSTALLATION:

Peel and stick the product to door or window with the double-sided tape. Keep the magnetic sensor positioned on the right side. The arrows should be parallel between the product and sensor.

OPERATION:

Slide the switch to "ON" to arm the device. If the protected entryway is opened while the alarm is armed, a loud 120dB alarm will immediately and continuously sound. Slide the switch to "OFF" to stop the alarm and disarm the device.

BATTERY INSTALLATION:

Remove the front cover to install the 3 LR44 batteries. Position the flat side of the batteries towards the top.
